CAREER PROFILE

Experienced Software Engineer specializing in API development, infrastructure automation, and DevOps practices. Proficient in Java, Go, and JavaScript, with working knowledge of Python, and expertise in tools like OpenTofu/Terraform, Ansible, Docker, and Kubernetes for streamlining infrastructure and operations.

Skilled in implementing infrastructure-as-code (IaC) solutions, including developing custom Terraform providers to meet unique business requirements. Currently at SIX Group in the Infrastructure and Operations department, I focus on building robust APIs, automation frameworks, and self-service platforms that empower teams to operate efficiently and scale effectively.

Passionate about efficiency and innovation, I thrive on delivering solutions that enhance operational performance while minimizing complexity. With a commitment to continuous improvement, I stay at the forefront of technology trends to ensure seamless integration, scalability, and cost-effectiveness in every project.

PROFESSIONAL EXPERIENCE

Senior Software Engineer Automation · SIX Group AG, Zürich

Jan 2024 - Present

- Built a Temporal workflow to automate role and entitlement provisioning, reducing manual ticket handling and enabling self-service access management.
- Developed SIX Terraform/OpenTofu Provider enabling Infrastructure as Code (IaC) for abstracted on-premises resources (Kong API Gateway, Tufin Firewall Rules & Objects, BMC Remedy ITSM).
- Created several inner sourced Go Client libraries for the Automation ecosystem.
- Developed a Go Microservice Application Scaffolding with its own CLI supporting initialization, upgrades and deployments.
- Designed a solution to deliver infrastructure streamlined self-services, IaC, and an Internal Developer Portal, moving towards Platform Engineering.
- Contributed to shaping and reviewing architecture documents and establishing automation standards.
- Actively participated in the DevOps culture, promoting best practices and continuous improvement across teams.
- Prepared and delivered technical presentations and bootcamps to share knowledge and foster a culture of learning within the organization.

Software Engineer · SIX Group AG, Zürich

Sep 2019 - Jan 2024

- Developed a Self-Service Portal for the API Gateway Platform using ReactJS and Spring Boot APIs.
- Created self-service automation solution with a microservice-oriented architecture (Spring Boot, Flowable, REST, OAuth2.0, MongoDB, Redis, Openshift/Helm).
- Built a complex user data synchronization hub with Spring Batch and Redis to connect two platforms.
- Managed operations for the API Gateway Platform, including regular on-call duties.
- Served as SCRUM Master

IT Business Consultant / DevOps Engineer · SWAROVSKI, Zürich

Jun 2018 - Aug 2019

- Development of a Saltstack execution module in Python for managing SAP Hybris
- IaC with Terraform and AWS
- Part of building the bridge between business, operations and development
- Continuous configuration management, maintenance and extension of IT-infrastructure and application to serve business demands
- Automation and scripting
- Support of operational processes, maintenance processes and new projects
- Support of DevOps toolchain for extending the existing applications

- Support of operational processes for the eCommerce infrastructure hosted on AWS
 - Cluster, applications performance monitoring
 - Issue troubleshooting, tuning and configuration management
 - Continuous integration and continuous delivery (Jenkins)
 - Automation & scripting
- Hybris Database migration from Oracle to AWS Aurora
- Head of architecture and development on the SAP Hybris platform
- Project Manager and lead developer: Outdoor Research B2C (Seattle WA, USA)
 - www.outdoorresearch.com (Redesign & Migration from Magento to SAP Hybris)
- Business & Technical analyses for new projects
- Java Development on SAP Hybris
 - B2B / B2C accelerators (Both sync & async integrations via Datahub)

Full Stack Web Developer · INDC Sàrl, Delémont

Aug 2006 - Jul 2010

Designed and developed web applications for various business needs, including:

- Project Management, CRM, and Helpdesk Management solutions
- A Press Website for media publishing
- An Intranet/Extranet Framework using ColdFusion
- Government applications for République et Canton du Jura (developed in ASP.NET C#)

Continued working part-time while attending Superior School of Business Information Technology.

SKILLS & PROFICIENCY

Java, Springboot, etc.	Infrastructure as Code & Cloud - Terraform/OpenTofu, AWS & Azure
Javascript/Typescript, React.JS, HTML, CSS	CI/CD & DevOps Toolchain - GitLab CI, Jenkins
Go, Temporal	Configuration as Code with Ansible
Python	Docker, Kubernetes / Openshift, Helm
APIs Management & Development, Kong API Gateway, OpenAPI 3.0, OAuth2.0, Developer Portal	Observability with Prometheus, Grafana & Splunk
Platform Engineering, Self-services development, DevOps Culture, Internal Developer Portal	

EDUCATION**BSc of Sciences in Business Information Technology** · HEG Arc, Neuchâtel 2010 - 2012**ES in Computer Science & Business Information** · ESIG 2008 - 2010**CFC in Computer Science** · EMT Porrentruy (EHMP) 2002 - 2006**CERTIFICATIONS & COURSES**

Platform Engineering Certified Practitioner (platformengineering.org)	May 2026	Introduction to Ansible Course	Apr 2019
Openshift Application Developer v4 (Red Hat)	Aug 2025	Serverless for Beginners – Build a Video Sharing App Course	Mar 2019
Microservices with NodeJS and React (Udemy)	Oct 2024	AWS Solutions Architect Associate – Course	Jan 2019
DevOps Foundation v3.4 (DevOps Institute Certification)	Apr 2024	AWS Cloud Practitioner Essentials – Course	Dec 2018
Go: The Complete Developer's Guide (Udemy Course)	Feb 2024	AWS Re:invent 2017 summit - Bootcamp : Migrate that expensive database to AWS Aurora	Dec 2017
Kong Gateway Foundations Courses	May 2022	Hybris Developer Training Part. II – Commerce	Sep 2014
Docker for DevOps – From Development to Production Course	Jun 2019	ScrumMaster Certification	Jul 2014
		Hybris Developer Training Part. I – Core Platform	Oct 2012
